# Is Your School System Prepared?

Our first question to any school administrator is "Are you prepared?" Today's educators are looking for ways to better prepare their school system for the safety of students and staff. To do this, we implement Classroom Enhancement Solutions.

Classroom Enhancement Solutions is a comprehensive technology deployment that helps the administrator increase safety and effectiveness in the classroom. This includes changes in.....

## Core Curriculum, Testing and Evaluations

Core Curriculum and Testing are designed to ensure that students are prepared for today's entry-level careers, freshman-level college courses, and workforce training programs. It focuses on developing the critical-thinking, problem-solving, and analytical skills students will need to be successful. They also provide a way for teachers to measure student progress throughout the school year and ensure that students are on the pathway to success in their academic careers. Evaluations are a means to produce useful feedback which the teacher and school can use to improve their quality of instruction. They are beneficial because instructors can review how others interpret their teaching methods, thereby improving their instruction.

## Emergency Preparedness

Homeland Safety Systems Emergency Management System is designed to provide quick reference of your facility in the event of an emergency situation. First responders are able to quickly access a floor plan of your facility, showing camera locations, and alert emergency crews of activity in their view. When movement is detected the camera locations will flash, providing an alert of possible unauthorized access to the facility and allowing quick access to individual camera views.

## Technology

We design and manufacture our own high quality system components. This allows us to build a system that is scaled to your present and future needs. From access control and intercoms to surveillance systems; we have the knowledge to support educators and administrators in acquiring, installing, training, maintaining and tracking. This maximizes the impact of technology on teacher effectiveness, administrative efficiency, and education. We believe that the effective, responsible and innovative use of technology is essential in maximizing the learning potential of our students.

## Bullying and Student Discipline

Bullying is a serious and complicated problem in our education system today. Identifying bullies is easy, however, catching them in the act with proof is usually much more challenging. Surveillance cameras are able to provide this proof, and eliminate the "he said, she said".

In conjunction with an effective campus security plan, SRO's and teachers monitoring the halls, any instances of bullying will have a witness. Administrators will have the means to counteract the situation with undeniable evidence before the situation becomes catastrophic.

With all that is at stake in today's educational pursuit for excellence, we need to formulate best practices in making sure our children receive the best education available. Don't expect a one-size-fits-all approach to deploying a system that will be such a valuable tool in the administration of your school system.

Homeland Safety Systems, Inc. is committed to partnering with schools and districts to meet their ever-changing needs. Our company has a commitment for products and services, improving accountability, increasing efficiency and effectiveness so educators can concentrate on what is most important - the STUDENTS.
